

A WEEK WITHOUT WATER AND SOME ANIMALS DIE.

Most of the planet is water. Most of your own body is too. There's a message in that – to hit the H₂O with your two feet running. It's why we built the Figawi Surge, the world's only true water shoe. Geared for max traction and torque when there's nothing dry to put a toe on. Wear it on any and all watercraft. On oceans, lakes and rivers. To face the heat of a race or the teeth of a squall. And to know why you were born to love the water. *To get wet.*
