

CHANGE HISTORY

Scan or download a historic photo. Using a second photo of you, put yourself into the first image such that a viewer would believe you were actually present when the photograph was taken. But beyond that, your very presence in the photo should change the historical context of the scene.

Your body must be inserted as an additional person in the picture, either in front or behind others. DO NOT replace anyone or simply paste your face on someone else's body. The key to this

assignment is to make the image of you FIT the first image.

Pay attention to lighting, color cast, brightness, sharpness, and contrast. You may also need to adjust your photo to fit the type of image into which you are being placed (grayscale/color) and artistic style (texture, noise, grain, etc.).

This assignment will be evaluated on the criteria found below.

change the historical context of the scene/tell a story

a viewer would believe you were actually present:

lighting

color cast

brightness

sharpness

contrast

degradation (noise, blur, etc.)

pro selections: softening/blurring/degrading selection edges

other:

.psd file that is RGB

minimum of 1200 × 1000 pixels

all layers, adjustment layers, channels, etc. should be intact (don't flatten anything)

show ALL your work
